Job Title: Mern Stack Developer

Respected HR,

I am excited to apply for the **Front End Web Developer** position at your company. With six months of experience in front-end web development, I am confident in my ability to create visually appealing and user-friendly interfaces. Although I have limited experience with **back-end development**, I am eager to learn and grow my skills in this area.

During my time as a Front End Web Developer, I have gained hands-on experience with **HTML, CSS, JavaScript, react, npm libraries and git-hub** and various front-end frameworks such as **Bootstrap, MUI**. I am responsible for building responsive and interactive user interfaces that provide an exceptional user experience. I have also used **APIs** and integrated third-party libraries into my projects.

While my experience with back-end development is limited, I have a basic understanding of web development principles, and I have worked with databases such as **MongoDB**. I am familiar with **server-side languages such as Node.js** and I have experience working with **APIs and JSON data**.

I am self-motivated, and I enjoy working independently. I have excellent communication skills, and I am able to work effectively with teams and clients. I am committed to continuous learning and staying up-to-date with the latest trends and technologies in both front-end and back-end web development.

I would greatly appreciate your review of my enclosed resume and outlined credentials. I believe that I can be a valuable addition to your business goals. **At your convenience, I am available for an interview or further discussion.**

Sincerely

Abdullah Tayyab
